PLDshell Plus™ Software **featuring the PLDasm™ Compiler/Simulator**

PLDshell Plus™

Congratulations on receiving your copy of PLDshell Plus, an easy-to-use software environment for designing with Intel's industry-standard PLDs and Intel's new FPGAs. PLDshell Plus lets you use your existing design tools, while adding a logic compiler and design conversion utilities for Intel's high-performance PLD and FPGA families.

PLDasm™

PLDasm™ software compiles PALASM® 2-compatible source files to produce JEDEC files for Intel μ PLDs. PLDasm allows you to design with Boolean Equation, State Machine, and Truth Table syntax, and to simulate your designs. PLDasm™ now supports Intel's FLEXlogic™ family of FPGAs.

Hotline Support

To assist you, a toll-free number is staffed by applications engineers each business day. If you encounter a difficulty with some area of your design, or can't find the right answer in the help files or documentation . . . call us from the U.S. or Canada at 1-800-323-EPLD . . . we can help! Outside the U.S. or Canada, please contact your local Intel sales office.

On-Line Bulletin Board

If you have access to a modem, you can dial in to our PC-based Bulletin Board System. It has the latest information on applications, helpful utilities that you can download, design examples, and lots more. From the U.S. or Canada, the number is 916-985-2308.
